

## Using ORION4Sight Eyewear:

**Put the Eyewear on. Leave them on. Nothing more. Then complete these simple 3-Performance Tests:**

### PERFORMANCE TEST #1

- 1. Put the Eyewear on and leave them on for least 15-minutes. (reduced times effect performance)*
- 2. Select a nearby colorful object such as a red car or a stop sign*
- 3. While looking at this object, very briefly remove the Eyewear and then put them back on*
- 4. Observe that with the ORION4Sight Eyewear in place, the red colors appear "more red" (i.e., improved color saturation), and that without the Eyewear, the red color appears "darker"*

### PERFORMANCE TEST #2

- 1. Put the Eyewear on and leave them on for least 15-minutes. (reduced times effect performance)*
- 2. Select and focus on smaller objects such as tree branches/leaves about a block away*
- 3. While looking at one specific object, very briefly remove the Eyewear and then put them back on*
- 4. Observe with the ORION4Sight Eyewear that small twigs or leaves on nearby tree branches are crisper and more clearly defined (i.e., improved visual acuity), and without the Eyewear the subject sharpness is "blurred or fuzzy"*

### PERFORMANCE TEST #3

- 1. Set time aside to wear the ORION4Sight Eyewear for extended times, 30-60 minutes or longer*
- 2. At the conclusion of your activity, ask yourself "how do my eyes feel?" Then make a mental note of your answer*
- 3. Observe you will likely notice a reduction in eye fatigue and eyestrain (i.e., your eyes will "just feel better")*
- 4. Remove the ORION4Sight Eyewear. Are your eyes "more comfortable and/or relaxed" with or without the Eyewear?*
- 5. Most individuals report their eyes are more relaxed when wearing the Eyewear for extended times. Without the Eyewear, nearly all respondents indicate the scene being viewed is briefly "fuzzy or out of focus" and their eyes are more strained*

**ENJOY!**
